Professional Summary

Modern Frontend Developer with two years of experience specializing in React.js, Next.js, and TypeScript. Proven ability to translate complex UI/UX designs into pixel-perfect, responsive, and cross-platform applications. Experienced in building and optimizing user-centric solutions, from e-commerce dashboards to large-scale document management systems. A collaborative developer dedicated to writing clean, reusable code and maximizing application performance.

Core Competencies & Technical Skills

- **Frontend:** JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
- **State Management:** Zustand, React Context API
- **Styling:** Tailwind CSS, CSS Modules
- **Backend:** Node.js, Express.js, Firebase (Firestore/Auth), REST APIs
- **Databases:** MongoDB, Firebase (Firestore)
- **Tools & Platforms:** Git, GitHub, VS Code, Figma, Vercel, Netlify, Jira, Trello
- **Soft Skills:** Problem-Solving, Team Collaboration, Communication, Proactive Learner

Work Experience

Frontend Developer (Freelance)
Buabed Banafa (E-commerce) | Remote
March 2025 – May 2025

- **Developed** and **launched** the complete client-facing e-commerce website using **Next.js** and **Tailwind CSS**, delivering a high-performance, responsive user experience.
- **Translated** high-fidelity Figma designs into a pixel-perfect, cross-browser compatible application, ensuring 100% accuracy to the original vision.
- **Proactively designed** and **built** a complete admin dashboard from the ground up, researching UI/UX best practices on Dribbble to create an intuitive management interface.
- **Collaborated** closely with the backend developer to seamlessly integrate REST APIs for product data, inventory, and order management.

Selected Projects

Food Mama (Food Order App) | [Food Resturant](#)

A front-end food ordering application built to solidify core React skills. Features a clean user interface, product filtering, and shopping cart functionality.

- **Tech Stack:** React.js, Tailwind CSS, Firebase (for data storage)

UploadDoc (Full-Stack Document Management Platform) | [UploadDoc](#)

A full-stack platform connecting students and professionals with printing vendors, providing a secure and organized system for document submission, tracking, and management.

- **Tech Stack:** Next.js, Node.js, Express.js, MongoDB, Tailwind CSS
- **Engineered** a location-based search feature to allow users to discover, compare, and select local printing vendors.
- **Designed** and **built** a comprehensive vendor dashboard from scratch for managing incoming print orders, tracking submission statuses, and overseeing operations.
- **Implemented** a secure, multi-user document upload and management system, replacing insecure email or messaging-based workflows.

Education

HND in Computer Science
Federal Polytechnic Ado Ekiti, Ado Ekiti, Nigeria | Expected November 2026
